

NexusDev AI — System Architecture & Process Flow Blueprint

Google ADK 2.0 • Gemini 3.6 Flash / 3.5 Pro • Google Cloud Run • Model Context Protocol

■ 1. End-to-End Step-by-Step SDLC Process Flow

■■ 2. 6-Layer Enterprise Technical Architecture Matrix

Subsystem Layer	Google Technology / Framework	Enterprise Function
Layer 1: Ingestion	Cloud Pub/Sub, Cloud Scheduler, FastAPI	Real-time Webhook push ingestion, Pub/Sub events, and recurring nightly cron security
Layer 2: 5 ADK Agents	Google ADK 2.0, Gemini 3.6 Flash / 3.5 Pro, Gemma 2	AI code generation with SF CLI self-correction, static security auditing, GitOps
Layer 3: Tools & Skills	Model Context Protocol (MCP), Agent Skills	Standardized JSON-RPC tool binding across Jira, Salesforce DX, and Git servers + don
Layer 4: Memory Bank	Google Cloud Firestore	Cross-session state persistence managing pipeline state across asynchronous Human-i
Layer 5: HITL Email	Email Notification Service (smtp lib)	Dispatches interactive HTML emails with Magic Approval Links to abeycm@gmail.com.
Layer 6: Observability	OpenTelemetry, Eval Engine, ADK Optimiz	Structured OpenTelemetry trace spans, quantitative LLM quality benchmark scores, and
